PROFESSIONAL SUMMARY

Frontend Developer and Flutter Developer with nearly 2 years of professional experience building and shipping production-ready React.js web applications and Flutter mobile applications for live EdTech clients. Skilled in React.js, React Hooks, Context API, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Flutter, Dart, GetX, Provider, REST API integration, JWT Authentication, and Firebase, with working familiarity in Next.js and TypeScript. Experienced in translating Figma designs into pixel-perfect, responsive user interfaces, integrating 60+ REST API endpoints across web and mobile products, and publishing 3 applications on Google Play Store with 50+ active users. Promoted from Frontend Developer Intern to Frontend Developer based on technical contributions and project delivery. Working knowledge of Next.js (App Router, routing, data fetching) through a personal full-stack project, and familiarity with TypeScript. Seeking Frontend Engineer, React.js Developer, UI Developer, or Flutter Developer roles in Chennai or Remote.

TECHNICAL SKILLS

Frontend Development React.js • React Hooks • React Context API • Redux • JavaScript (ES6+) • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Framer Motion • Responsive Web Design • Cross-Browser Compatibility • UI Development

Performance Optimization React.memo • useMemo • useCallback • Lazy Loading • Code Splitting • Bundle Optimization • Image Optimization

Next.js Working Knowledge • App Router • Client/Server Routing • Data Fetching • Vercel Deployment

Familiar With TypeScript

Mobile Development Flutter • Dart • GetX • Provider • Google Play Store • Play Store Deployment • Responsive UI • Flutter Animations • Flutter Widgets

Backend / API Integration REST API Integration • JWT Authentication • Firebase • Firebase Authentication • Firebase Firestore

Tools & Practices Git • GitHub • Branching & Merge Workflow • Pull Requests • Code Reviews • npm • Vite • Figma • Postman • VS Code • Android Studio • Chrome DevTools • ESLint • Prettier • Agile • Scrum • Component-Based Architecture • State Management • RBAC Access Control

Deployment Vercel • Google Play Console

CORE COMPETENCIES

Responsive Web Design • Pixel-Perfect UI Development • REST API Integration • Component-Based Architecture • React Hooks & Context API • State Management • Authentication & Authorization • Cross-Browser Compatibility • Mobile App Development • Play Store Deployment • Performance Optimization • Agile Development • Client Communication

WORK EXPERIENCE

Frontend Developer & Flutter Developer

Dataspark AI Solutions • Full-time • Dec 2024 – Present • 15 Days Notice

- Delivered 3+ dual-platform products (React.js web + Flutter mobile) for live EdTech clients, owning frontend and mobile development end-to-end.
- Built IELTSGenAI as both a React.js web app and Flutter mobile app, implementing JWT authentication, Redux state management, and REST API integration.
- Developed ESL English Learning App in Flutter with audio lessons and a 5-level curriculum, reaching 50+ active users on Google Play Store.
- Built NEET/JEE Learning Platform — Flutter mobile app (Play Store) + React.js web portal — with practice tests, progress tracking, and performance analytics.
- Built responsive React.js UI components from Figma designs using HTML5, CSS3, Tailwind CSS, and Bootstrap.
- Integrated REST API endpoints with JWT authentication across web and mobile products, ensuring secure data handling.
- Implemented scalable state management using Redux (React.js) and GetX / Provider (Flutter) across all products.
- Built role-based admin dashboards with React.js and Tailwind CSS, including RBAC access control for 3+ client accounts.
- Integrated Firebase Authentication and Firebase Firestore for secure login and real-time content management.
- Led client demos, requirement-gathering, and Agile sprint planning independently, delivering all projects on schedule.
- Optimized React.js app performance using React.memo, useMemo, useCallback, lazy loading, and code splitting to reduce unnecessary re-renders and improve load times.

Frontend Developer Intern

Dataspark AI Solutions • Full-time • Sep 2024 – Dec 2024

- Built responsive React.js UI components from Figma designs and integrated REST APIs in live client projects from day one.
- Gained production experience in component architecture, API integration, and cross-browser testing within first month.
- Promoted Intern → Frontend Developer based on technical contributions and performance.

KEY PROJECTS

IELTSGenAI – AI-Powered IELTS Learning Platform — Web & Mobile

React.js • Flutter • Redux • GetX • JWT Auth • REST API

- Full-stack EdTech product — React.js web app + Flutter mobile app for AI-powered IELTS exam prep.
- Handled JWT auth, Redux/GetX state management, content delivery, and user progress tracking across both platforms.

ESL English Learning App – Mobile Language Learning Platform

Flutter • Dart • Firebase Firestore • Firebase Auth • REST API

- Flutter mobile app with audio lessons, interactive exercises, and 5-level curriculum — 50+ active Play Store users.

- Integrated Firebase Firestore for real-time content management and Firebase Auth for secure user login.

NEET / JEE Learning Platform – Competitive Exam Prep — Web & Mobile

Flutter · React.js · Redux · Provider · REST API

- Full-stack product — Flutter mobile app (Play Store) + React.js web portal for competitive exam preparation.
- Features: subject-wise practice tests, real-time progress tracking, performance analytics, and Redux/Provider state management.

Student Management Admin Dashboard — AI-Powered Admin Panel

React.js · Tailwind CSS · REST API

- Comprehensive admin dashboard for managing IELTS/PTE students with AI insights for performance monitoring.
- Designed and developed full admin panel UI from scratch with RBAC access control for 3+ client accounts.

ACHIEVEMENTS

- Promoted from Frontend Developer Intern to Frontend Developer based on project ownership and delivery.
- Published 3 production Flutter applications independently on Google Play Store with 50+ active users.
- Delivered 3+ dual-platform (React.js + Flutter) products for live EdTech clients.
- Integrated REST APIs across web and mobile production applications with JWT authentication.
- Built 50+ reusable React and Flutter component patterns adopted across multiple client products.
- Collaborated directly with clients on requirement-gathering, demos, and Agile sprint planning.
